Industrial Motion

TiMOTION's TA2 series linear actuator is compact, robust and capable of performing well in certain outdoor environments. This linear actuator is perfect for use in small spaces where force or capability cannot be sacrificed. Options include feedback sensors, signal sending limit switches and 90 degree clevis mounting.

General Features

Max. load 1,000N (push/pull)

Max. speed at max. load 7.6mm/s
Max. speed at no load 67.5mm/s

Retracted length ≥ Stroke + 105mm (without output signals)

IP rating IP66M Certificate EMC

Stroke 20~1000mm

Output signals Mechanical pot., embedded reed switch,

NPN Hall sensor, Adjustable Reed switch

Voltage 12/24/36/48V DC; 12/24/36/48V DC (PTC)

Color Silver

Operational temperature range $+5^{\circ}\text{C} \sim +45^{\circ}\text{C}$ (Load < 500N);

 $-25^{\circ}\text{C} \sim +65^{\circ}\text{C} \text{ (Load } \geq 500\text{N)}$

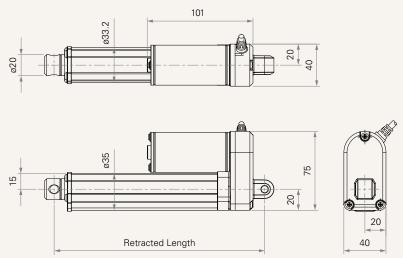

Operational temperature range

at full performance

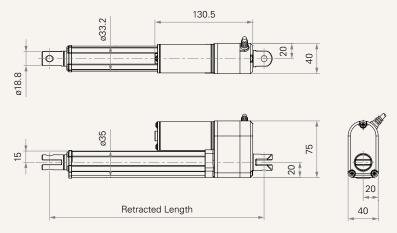

+5°C~+45°C

Note

- 1 Please refer to the approved drawing for the final authentic value.
- 2 This self-locking force level is reached only when a short circuit is applied on the terminals of the motor. All the TiMOTION control boxes have this feature built-in.
- 3 The current & speed in table are tested with 24V DC motor. With a 12V DC motor, the current is approximately twice the current measured in 24V DC. With a 36V DC motor, the current is approximately two-thirds the current measured in 24V DC. With a 48V DC motor, the current is approximately half the current measured in 24V DC. Speed will be similar for all the voltages.
- 4 The current & speed in table are tested when the actuator is extending under push load.
- 5 The current & speed in table and diagram are tested with a stable 24V DC power supply.
- 6 With load, noise level \leq 74dBA (by TiMOTION test standard, ambient noise level \leq 36dBA)
